

## AB BRONCO

### Winter triticale

- Reduced awn, suitable for forage and feed
- Higher forage digestibility than all triticale checks
- Winter survival exceeds all winter triticale checks

#### Strengths of AB Bronco

- High grain yield, 117% of Bobcat and 106% of Metzger.
- Winter survival is higher than all checks.
- Maturity is earlier than all checks, and three days earlier than Luoma.
- Ergot resistance is higher than Metzger and Bobcat.
- Better forage digestibility than Metzger, Bobcat and Luoma.

AB Bronco was developed by Western Crop Innovations and is available through Corns Seeds.
