

AB SNOWCAT

Winter triticale

- Reduced awn, suitable for forage and feed
- Matures 4 days earlier than checks
- High winter survival

Strengths of AB Snowcat

- Winter survival is 94%, better than all winter triticale and winter wheat checks.
- Grain yield is 125% of Bobcat, 112% of Metzger, and 104% of Luoma.
- Maturity is five days earlier than Luoma and 3 days earlier than Metzger.
- Resistant to lodging, as AB Snowcat is shorter than Metzger and Luoma, and taller than Bobcat.

AB Snowcat was developed by Western Crop Innovations and is available through [Canterra Seeds](#).
